If you dream of the future... if you want to create the future... in order to change the future, you have to Vote the Future.

The mission of Vote the Future is to raise awareness among young adults of the rights and responsibilities of citizenship. Vote the Future partners with nonprofits in order to get the word out through social media campaigns about the importance of registering and the significance of turning out the vote.

The vision of this social media project is an increase in voter registration and an increase in voter turnout among young adults and eligible first-time voters. The campaign seeks to help first-time voters understand the power of voting, successfully register to vote and have their voices heard on election day.
